

Amendments to the Claims

The listing of claims will replace all prior versions, and listings of claims in the application.

1. (Currently Amended) [[An]] A sterile aqueous pharmaceutical composition for parenteral administration of propofol, said composition comprising propofol and one or more excipient, wherein said composition is stored in a container having a means for dispensing the composition, and wherein the total propofol degradants of the solution when maintained at 25 °C, 40 °C, or 60 °C for 4 weeks are present in an amount of less than 5% (w/v) of said composition.

2. (Currently Amended) The composition of Claim 1, wherein said one or more excipient is selected from the group consisting essentially of a GRAS excipient, purified poloxamer, Ammonium acetate, Benzalkonium chloride, Benzethonium chloride, Benzyl alcohol, Brij 35, Brij 97, Calcium gluceptate, ChlorobutanOL, Citric Acid, Cremophor EL, Deoxycholate, Diethanolamine, Ethanol, Gamma cyclodextrin, Glycerin, Lactobionic acid, Lysine, Magnesium chloride, Methylparaben, PEG 1000, PEG 300, PEG 3350, PEG 400, PEG 600, Poloxamer 188, Poloxamer 237, Poloxamer 338, Poloxmer 407, Polyoxyethylene 100 stearate, Polyoxyethylene 40 stearate, Polyoxyethylene 50 stearate, Polysorbate 20, Polysorbate 80, Povidone, Propylene Glycol, Sodium acetate, Vitamine E TPGS, Sodium benzoate, and Sodium tartate.

3. (Currently Amended) The composition of Claim 1, wherein said one or more excipient is a combination selected from the group consisting of:

- a) Benzalkonium chloride, Cremophor EL;
- b) Benzalkonium chloride, Poloxamer 237;
- c) Benzalkonium chloride, Benzethonium chloride, Poloxamer 237;
- d) Benzalkonium chloride, Cremophor EL, Polysorbate 80;
- e) Benzalkonium chloride, Cremophor EL, Propylene Glycol;
- ~~f) Benzalkonium chloride, Cremophor EL;~~
- g) Benzalkonium chloride, PEG 400, Poloxamer 237;
- h) Benzalkonium chloride, Poloxamer 188, Poloxamer 338;
- i) Benzalkonium chloride, Poloxamer 188;
- j) Benzalkonium chloride, Poloxamer 237, Polyoxyethylene 40 Stearate;
- k) Benzalkonium chloride, Poloxamer 237, Polysorbate 80;
- l) Benzalkonium chloride, Poloxamer 237, Propylene Glycol;
- m) Benzalkonium chloride, Poloxamer 237, vitamine E TPGS;
- n) Benzalkonium chloride, Poloxamer 237, Saccharin sodium;
- o) Benzalkonium chloride, Poloxamer 338;
- ~~p) Benzalkonium chloride, Poloxamer 338;~~
- q) Benzalkonium chloride, Poloxamer 407;
- r) Benzalkonium chloride, Poloxamer 407, Polyoxyethylene 40 Stearate;
- s) Benzalkonium chloride, Poloxamer 407, Polysorbate 80;
- t) Benzalkonium chloride, Poloxamer 407, vitamine E TPGS;
- u) Benzethonium chloride, Cremophor EL;

- v) Benzethonium chloride, Cremophor EL, PEG 400;
- w) Benzethonium chloride, Cremophor EL, Poloxamer 237;
- x) Benzethonium chloride, Cremophor EL, Poloxamer 338;
- y) Benzethonium chloride, Cremophor EL, Poloxamer 407;
- z) Benzethonium chloride, Cremophor EL, Polysorbate 80;
- aa) Benzethonium chloride, Cremophor EL, Propylene Glycol;
- bb) Benzethonium chloride, Cremophor EL, vitamine E TPGS;
- ~~cc) Benzethonium chloride, Cremophor EL;~~
- dd) Benzethonium chloride, PEG 400, Poloxamer 188;
- ee) Benzethonium chloride, PEG 400, Poloxamer 237;
- ff) Benzethonium chloride, PEG 400, Poloxamer 338;
- gg) Benzethonium chloride, PEG 400, Poloxamer 407;

4. (Currently Amended) The composition of Claim 1, wherein:

- a) said propofol is present in a concentration of about 0.5 to 10% (w/v);
- b) said propofol is present in a concentration of about 0.5 to 5% (w/v);
- c) said propofol is present in a concentration of about 1 to 3% (w/v); or
- d) said propofol is present in a concentration of about 1% (w/v).

5. (Currently Amended) The composition of Claim 1, wherein:

- a) said excipient is present in a concentration of about 0.1 to 25% (w/v);
- b) said excipient is present in a concentration of about 0.5 to 10% (w/v);

or

- c) said excipient is present in a concentration of about 1 to 5% (w/v).

6. (Currently Amended) The composition of Claim 1, wherein:

a) said composition comprises poloxamer 188, polyethylene glycol 400, and propylene glycol:

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

b) said composition comprises poloxamer 188 and polyethylene glycol 400:

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

c) said composition comprises poloxamer 188 (8% w/v), polyethylene glycol 400 (4% w/v), and propylene glycol (1% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

d) said composition comprises poloxamer 188 (8% w/v), polyethylene glycol 400 (3% w/v), and propylene glycol (1% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

e) said composition comprises poloxamer 188 (8% w/v), polyethylene glycol 400 (2% w/v), and propylene glycol (1% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

f) said composition comprises poloxamer 188 (8% w/v) and polyethylene glycol 400 (3% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

g) said composition comprises poloxamer 188 (8% w/v) and polyethylene glycol 400 (2% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

h) said composition comprises poloxamer 188 (8% w/v) and polyethylene glycol 400 (4% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

i) said composition comprises poloxamer 188 (7% w/v), polyethylene glycol 400 (3% w/v), and propylene glycol (1% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

j) said composition comprises poloxamer 188 (7% w/v) and polyethylene glycol 400 (3% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate,

benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

i) said composition comprises poloxamer 188 (7% w/v), polyethylene glycol 400 (2% w/v), and propylene glycol (1% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

j) said composition comprises poloxamer 188 (7% w/v) and polyethylene glycol 400 (2% w/v)

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

k) said composition comprises poloxamer 188 (6% w/v), polyethylene glycol 400 (4% w/v), and propylene glycol (1% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal;

l) said composition comprises poloxamer 188 (6% w/v), polyethylene glycol 400 (4% w/v), and propylene glycol (2% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal; or

m) said composition comprises poloxamer 188 (9% w/v) and polyethylene glycol 400 (2% w/v):

(i) wherein said composition further comprises one or more compound selected from citric acid, disodium edetate, metabisulfate, benzyl alcohol, an antioxidant, a preservative, an antimicrobial agent, or a microbicidal[[:]].

7. (Canceled)

8. (Currently Amended) The composition of Claim 1, wherein:

a) said composition has a particle size diameter of between 25 and 200 nm;

b) said composition has a particle size diameter of between 50 and 100 nm; or

c) said composition forms particles of similar particle size.

9. (Currently Amended) The composition of Claim 1, wherein:

a) said composition does not support microbial growth;

b) said composition is microbicidal; or

c) said composition is sufficient for no more than a 10-fold increase in growth, of *Staphylococcus aureus* ATCC 6538, *Escherichia coli* ATCC 8739, *Pseudomonas aeruginosa* ATCC 9027 or *Candida albicans* ATCC 10231 for at least 24 hours.

10. (Currently Amended) The composition of Claim 1, wherein:

a) said composition is functionally bioequivalent to commercial lipid based anesthetic products:

(i) wherein said bioequivalence is demonstrated in dogs;

(ii) wherein said bioequivalence is demonstrated in humans; or

b) said composition has a red blood cell blood plasma partition coefficient greater than that of commercial lipid based ~~anesthetic~~ anesthetic products:

(i) wherein said partition coefficient for said composition is between about 2 and 4.

11. (Currently Amended) The composition of Claim 1, further comprising:

a) an acid;

b) a base;

c) a local anesthetic;

d) a second general anesthetic;

e) an antimicrobial agent;

f) a surfactant;

g) a tonicity modifier;

- (i) wherein said tonicity modifier is glycerol;
- h) a pH modifier; or
- j) a second, third, fourth, fifth, or sixth excipient.

12. (Currently Amended) The composition of Claim 1, wherein said composition is substantially free of:

- a. a lipid, a long chain fatty acid, triacylglycerol, or glycerol ester;
- b. an antimicrobial agent; or
- c. a preservative.

13. (Currently Amended) The composition of Claim 1, wherein said excipient is purified poloxamer:

- a) wherein said purified poloxamer has a polydispersity value of between about 5 and 1, about 4 and 1, about 3 and 1, about 2 and 1, or about 1.1 and 1.

14. (Currently Amended) The composition of Claim 1, wherein:

- a) said propofol is present in a concentration of about 0.5 to about 1.5 percent (w/v);
- b) said propofol is present in a concentration of about 0.9 to about 1.1 percent (w/v);
- c) said composition comprises *D-alpha*-tocopheryl polyethylene glycol 1000 succinate and in a concentration of about 1 to about 5 percent (w/v);

d) said composition comprises sodium deoxycholate in a concentration of about 1.5 to about 6 percent (w/v);

e) said composition comprises polyoxyethylene 20 sorbitan monooleate, *D-alpha*-tocopheryl polyethylene glycol 1000 succinate, and sodium deoxycholate in a total concentration of about 15 percent or less (w/v);

f) said composition comprises citric acid or a salt thereof in a concentration of at least about 0.1 percent (w/v);

g) said composition comprises water, 2,6-diisopropylphenol, polyoxyethylene 20 sorbitan monooleate, *D-alpha*-tocopheryl polyethylene glycol 1000 succinate, sodium deoxycholate, optionally, a tonicity modifier, and optionally, a pH modifier;

h) said composition comprises water, 2,6-diisopropylphenol, polyoxyethylene 20 sorbitan monooleate, *D-alpha*-tocopheryl polyethylene glycol 1000 succinate, sodium deoxycholate, and optionally, citric acid or a salt thereof;

i) said composition comprises about 0.5 to about 2.4 percent (w/v) of 2,6-diisopropylphenol; about 1 to about 15 percent (w/v) of polyoxyethylene 20 sorbitan monooleate; about 0.5 to about 15 percent (w/v) of *D-alpha*-tocopheryl polyethylene glycol 1000 succinate; and about 1 to about 15 percent (w/v) of sodium deoxycholate;

j) said composition comprises about 0.5 to about 2.4 percent (w/v) of 2,6-diisopropylphenol; about 2 to about 15 percent (w/v) of polyoxyethylene 20

sorbitan monooleate; about 0.5 to about 15 percent (w/v) of Poloxamer 237; and about 1 to about 15 percent (w/v) of polyethylene glycol 40 stearate;

k) said excipient is polyoxyethylene 20 sorbitan monooleate in a concentration of about 3 to about 7 percent (w/v);

l) said excipient is Poloxamer 237 in a concentration of about 1 to about 5 percent (w/v);

m) said excipient is polyethylene glycol 40 stearate in a concentration of about 1.5 to about 6 percent (w/v);

n) said composition comprises polyoxyethylene 20 sorbitan monooleate, Poloxamer 237, and polyethylene glycol 40 stearate in a total concentration of about 15 percent or less (w/v);

o) said composition comprises water, propofol, polyoxyethylene 20 sorbitan monooleate, Poloxamer 237, polyethylene glycol 40 stearate, optionally, a tonicity modifier, and optionally, a pH modifier;

p) said composition comprises propofol, polyoxyethylene 20 sorbitan monooleate, Poloxamer 237, polyethylene glycol 40 stearate, and, optionally, citric acid or a salt thereof;

q) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 2 to about 15 percent (w/v) of polyoxyethylene 20 sorbitan monooleate; about 0.5 to about 15 percent (w/v) of Poloxamer 237; and about 1 to about 15 percent (w/v) of polyethylene glycol 40;

r) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 2 to about 15 percent (w/v) of polyoxyethylene 20 sorbitan

monooleate; about 2 to about 20 percent (w/v) of polyethylene glycol 400; and about 0.1 to about 15 percent (w/v) of polyethylene glycol 40 stearate;

s) said composition comprises water, propofol, polyoxyethylene 20 sorbitan monooleate, polyethylene glycol 400, polyethylene glycol 40 stearate, optionally, a tonicity modifier, and optionally, a pH modifier;

t) said composition comprises water, propofol, polyoxyethylene 20 sorbitan monooleate, polyethylene glycol 400, polyethylene glycol 40 stearate, and, optionally, citric acid or a salt thereof;

u) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 2 to about 15 percent (w/v) of polyoxyethylene 20 sorbitan monooleate; about 2 to about 20 percent (w/v) of polyethylene glycol 400; and about 0.1 to about 15 percent (w/v) of polyethylene glycol 40 stearate;

v) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 3 to about 20 percent (w/v) of polyethylene glycol 400; and about 1 to about 15 percent (w/v) of Poloxamer 237;

~~w) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 3 to about 20 percent (w/v) of polyethylene glycol 400; and about 1 to about 15 percent (w/v) of Poloxamer 237;~~

x) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 1 to about 15 percent (w/v) of sodium deoxycholate; and about 2 to about 15 percent (w/v) of *D-alpha*-tocopheryl polyethylene glycol 1000 succinate; or

y) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 0.5 to about 15 percent (w/v) of polyoxyethylene 20 sorbitan monooleate; about 0.5 to about 15 percent (w/v) of propylene glycol; about 1 to about 20 percent (w/v) of polyethylene glycol 400; and about 2 to about 15 percent (w/v) of Poloxamer 188[;].

~~z) said composition comprises about 0.5 to about 2.4 percent (w/v) of propofol; about 0.5 to about 15 percent (w/v) of polyoxyethylene 20 sorbitan monooleate; about 0.5 to about 15 percent (w/v) of propylene glycol; about 1 to about 20 percent (w/v) of polyethylene glycol 400; and about 2 to about 15 percent (w/v) of Poloxamer 188.~~

15.-16. (Canceled)

17. (New) A sterile, aqueous pharmaceutical composition for parenteral administration of propofol, said composition comprising propofol and one or more excipients, wherein said one or more excipients comprise a solvent for propofol that is present in an amount of less than about 10 % (w/v), wherein said composition is stored in a container having a means for dispensing the composition, and wherein said composition does not exhibit substantial propofol degradation.

18. (New) The sterile pharmaceutical composition of claim 17, wherein said composition further comprises a solvent for propofol.

19. (New) The sterile pharmaceutical composition of claim 18, wherein the solvent is a water-immiscible solvent.

20. (New) The sterile pharmaceutical composition of claim 19, wherein the water-immiscible solvent is selected from the group consisting of soybean oil, sunflower oil, arachis oil, castor oil, an ester of medium or long-chain fatty acid, hydrogenated castor oil, and mixtures thereof.

21. (New) The sterile pharmaceutical composition of claim 20, wherein the water-immiscible solvent is soybean oil.

22. (New) The sterile pharmaceutical composition of claim 18, wherein the solvent is selected from the group consisting of ethanol, polyethylene glycols, and mixtures thereof.

23. (New) The sterile pharmaceutical composition of claim 18, wherein the means for dispensing the composition does not cause substantial propofol degradation.

24. (New) A sterile pharmaceutical composition for parenteral administration of propofol, said composition comprising propofol and less than about 10 % by weight solvent for propofol, wherein said composition is stored in a container having a closure, wherein said closure is inert to propofol.
